Design Brief

Patient Portal Redesign — UX Audit & Redesign

v4

Project Code:	PPR-26A
Client:	HealthFirst Regional Health System
Version:	v4
Date:	October 3, 2026
Delivery Deadline:	2026-12-18
Author:	Anita Patel, Senior UX Designer

Competitors in Scope

1. MyHealthHub Portal
2. CareNav Portal
3. WellSync Patient Portal

Scope Summary

This engagement covers a focused UX audit and redesign of the HealthFirst patient portal, scoped to three direct competitors identified through relevance scoring. The team will conduct heuristic evaluations, three rounds of moderated usability testing (15 participants total), and a component-level inventory of the existing portal. Deliverables include an annotated audit deck with severity-rated findings, redesigned high-fidelity screens for top-priority flows (login, prescription refill, messaging), and a handoff-ready component library in Figma.

Design Principles

- Accessibility-first (WCAG 2.1 AA minimum)
- Mobile-responsive across breakpoints
- Reduce cognitive load in multi-step flows
- Consistent wayfinding and navigation patterns

Team

- Anita Patel — Lead, Senior UX Designer
- Raj Mehta — UX Designer
- Tanya Brooks — Junior UX Designer
- Cass Leung — UX Researcher

Stakeholder Contacts

- Dr. Priya Menon, VP Digital Health, HealthFirst
- Jason Goud, Product Manager, HealthFirst
- Lila Fontaine, Design Director, Meridian UX Group

Notes

Scope narrowed from 5 competitors (v2) to 3 based on Sept relevance scoring.
MediTrack and VitalView dropped — minimal feature overlap with HealthFirst.
Deadline extended from Nov 15 to Dec 18 per client request (Oct 1 change order).
