LABORATORY REPORT

FINAL REPORT

PATIENT INFORMATION

Name **Croft, Alden Roy**
DOB / Age **April 22, 1974 (51 yrs)**
Sex **Male**
MRN **01182246**
Account # **PB-7741920**

SPECIMEN & ORDER

Collected **01/15/2026 08:42**
Received **01/15/2026 10:05**
Reported **01/16/2026 14:11**
Accession # **26-0151-44827**
Specimen **Serum, venous**
Ordering MD **F. Harrigan, MD**

IRON STUDIES / FERRITIN

TEST	RESULT	FLAG	REFERENCE RANGE	UNITS
Iron, Serum	95	N	65 – 175	µg/dL
Iron Binding Capacity (TIBC)	312	N	250 – 425	µg/dL
Transferrin Saturation	30	N	20 – 50	%
Ferritin	148	N	30 – 400	ng/mL

CLINICAL NOTE / COMMENT

Hereditary hemochromatosis (ICD-10 E83.110) under maintenance therapy. Iron indices and ferritin are stable and within the target range; no adjustment to phlebotomy interval indicated at this time.

Therapeutic phlebotomy — next draw due: Friday, October 16, 2026. Patient to schedule with the Pen Bay Therapeutic Phlebotomy program; bring this report to the visit.

Electronically verified & released by:

Anil Mehta, MD, PhD · Laboratory Director (CLIA)

Methods: immunoturbidimetric / colorimetric.

Results apply only to the specimen tested.

Report generated 01/16/2026.
