Brucellosis — Interstate Movement of Cattle Producer Quick Reference — 9 CFR Part 78

APHIS-VS Form Insert 78-A (rev. 04/2021) — Effective April 1, 2021

TEST REQUIREMENT

Sexually intact cattle 18 months of age or older moved interstate for any purpose other than immediate slaughter must have a negative official brucellosis test conducted within sixty (60) days prior to the date of movement. Approved tests: Standard Card (BAPA), Rivanol, CFT, FPA, BAPA-supplemental. Test must be drawn and read by an accredited veterinarian or a State or Federal animal-health official.

EXEMPTIONS (see full rule)

- Steers and spayed heifers
- Animals consigned direct to slaughter under permit
- Animals from Class Free states moving to a Class Free state, where consignor and consignee herds are not under investigation

Keep this flyer with your herd health records.
