RECALL NOTICE — 2026-RB-09

Issued: October 11, 2026

To: All bulk-ration customers

A routine quality-assurance test on our October production run detected elevated aflatoxin levels in three lot codes. The contamination has been traced to a single corn delivery sourced from a contract grower in Buffalo County. The affected lots are listed below.

Affected lots — please do not feed:

RBF-26-K281 RBF-26-K282 RBF-26-K283

Cleared — not affected:

RBF-26-K284 RBF-26-K285 (and subsequent runs)

If you have any of the three affected lots on hand, please:

1. Tag and set aside the bags. Do not feed.
2. Call our recall line: (715) 555-0119, reference 2026-RB-09.
3. We will arrange pickup and full credit at no charge to the producer.

We apologize for the inconvenience.

— Dale Krautkramer, QA Manager
