

Autumn 2026 Collection Readiness Report

Generated: June 9, 2026 | Path: Drive/Northern Remedy Co./Autumn 2026 Launch/

1. Target SKU Cross-Reference

This launch readiness track guarantees technical validation across the active pipeline SKUs introduced in T1:

- **ESY-2509** — Elderberry Syrup
- **FC-2509** — Fire Cider
- **AIBT-2509** — Autumn Immune Blend Tincture
- **HTB-2509** — Harvest Tea Blend

2. Operational Dimensions Risk Triage

DIMENSION	STATUS	AUTHORITATIVE SOURCE VERIFICATION
Inventory Ratios	GO	Airtable Master Base Formulation View
Supply Logistics	HOLD	Thornfield Supplier Tracking Sheet (`D+1` baseline entry)
Fulfillment Matrix	GO	WooCommerce Staging Catalog Terminal
Packaging Specs	GO	Product Spec Sheet v1 (Amber Glass 2 oz Baseline)

3. Critical Cross-Source Gaps Surfaced

GAP-01 (Supply Schedule Discrepancy): Cross-checking the baseline **Thornfield Supplier Tracking Sheet** reveals a processing log mismatch against our internal prep timeline. While the current launch framework assumes immediate bulk maceration starts on June 10 (`D+1`), raw component arrivals from Missoula are noted as holding until late afternoon, causing a structural 48-hour lag in raw oil press setups that must be cleared by master inventory before production flags go green.
