

Product Specification Review Summary

Executed: June 9, 2026 | Document Target: Autumn 2026 Design Pipeline

Following review of engineering modifications, the newly introduced **Autumn_Collection_Spec_Sheet_v2_REVISED.pdf** is officially declared the **authoritative source of record** for all upcoming production loops, effectively superseding v1 guidelines.

Itemized Spec Changes & Downstream Impact Analysis

Amended Spec Line	Modification Parameters Details	Downstream Impact Tag
Fluid Volume Scale	Liquid container baseline shifted from 2 oz glass vials to 4 oz volume units across syrups and tinctures.	{INVENTORY} {FULFILLMENT}
Closure System	Replaced standard continuous thread phenolics with high-durability integrated mechanical tamper-evident break caps.	{LAUNCH PREP}
AIBT-2509 Tincture Ratio	Active botanical mix adjusted: Elderberry concentration scaled +10% (to 45%), Echinacea root scaled -5% (to 25%).	{LABELING} {MARKETING COPY}
