

Source Water Quality Report - August 2026

Issued by: Asheville Municipal Water Authority
Service address: 142 Mill Stream Road, Asheville NC 28801
Account: BBC-AMW-04421 | **Sample date:** 11 Aug 2026

Source water mineral profile (ppm unless noted)

Analyte	Result	Acceptable range	Brewing band
Calcium (Ca)	44.6	0 - 200	50 - 150 typical
Magnesium (Mg)	8.2	0 - 30	5 - 30
Sodium (Na)	11.4	0 - 200	0 - 150
Sulfate (SO4)	27.0	0 - 400	varies by style
Chloride (Cl)	9.8	0 - 250	varies
Bicarbonate (HCO3)	38.5	0 - 400	0 - 100 for stouts
pH	7.1	6.5 - 8.5	5.2 - 5.6 mash
Total hardness (CaCO3)	145	0 - 500	100 - 300

All analytes within Safe Drinking Water Act limits. No detectable lead, copper, nitrate, or VOCs at reporting thresholds. Routine annual report; no action required.

Lab certification: NC DENR ELAP #62-118. Report reviewed by Janelle Murphy, RS. For questions: water-quality@asheville-nc.gov, (828) 555-7700.
