

Horizon Europe — Green Infrastructure

Programme Newsletter · general circulation

This newsletter goes to everyone subscribed to the programme list. It is informational only and is not addressed to any single applicant or application. Nothing below needs a response.

In this issue

- Results stories from previously funded green-corridor and urban-cooling projects.
- A reminder that programme guidance documents are refreshed each year on the portal.
- Upcoming information days (generic, open to all; not a project milestone).
- Tips on writing impact sections, reused from last year's guidance.

Note

Specific application deadlines, co-funding commitments, and partner signatories are never communicated through this newsletter; those live in your own application workspace and partner documents. Treat this as background reading.
